EDUCATION

University of Southern California Master of Science in Computer Science (GPA: 3.7/4.0) Coursework: Web Technologies, Machine Learning, Information Retrieval, Database Systems, Analysis of Algorithms	Los Angeles, CA Aug 2023 - May 2025
University of Mumbai Bachelor of Engineering in Computer Engineering (CGPA: 3.9/4.0) Coursework: Data Structures, Object Oriented Design, Operating System, Distributed Systems, Cloud Computing, AI	Mumbai, India Aug 2018 - June 2021

EXPERIENCE

University of Southern California Digital Student Assistant - Front End Developer - Designed and developed scalable web pages using HTML5, CSS3, and JavaScript, enhancing USC’s fundraising platform - Built responsive, interactive landing pages with real-time donation tracking, improving engagement for 50,000+ users - Worked with USC’s custom-built CMS to design and optimize digital fundraising campaigns that helped raise \$150,000+	Los Angeles, CA Oct 2024 - Apr 2025
USC GRIDS Web Developer and E-board member - Revamped committee website using HTML, CSS & TypeScript, optimizing performance & increasing user engagement by 20% - Partnered with stakeholders to define and implement scalable features, ensuring continuous platform improvements	Los Angeles, CA Feb 2024 - May 2024
JPMorgan Chase and Co. Software Engineer II - Led development and implementation of 27+ new application features using Java and Spring Boot, collaborating with Operations, Production Management, and Client Onboarding teams while adhering to enterprise coding standards - Conducted and participated in code reviews, managed Bitbucket repositories, and streamlined build processes to ship 5 production releases and maintain high code quality - Owned full software development lifecycle (SDLC) for 4 fintech SWIFT Payments AMH applications across DEV, QA, UAT, and PROD environments, leveraging Gradle, Jenkins CI/CD pipelines, and ServiceNow to deliver scalable solutions - Developed automated test strategies and unit/functional tests using JUnit, driving up code coverage by 30% - Analyzed and resolved 11+ critical technical issues, including patching security vulnerabilities and enhancing encryption algorithms, reducing live production incidents by 35% during monthly on-call rotations - Boosted team productivity by 40% by leveraging Atlassian tools (JIRA, Confluence, Bitbucket) and Scrum methodologies for agile project management, tracking, and documentation	Mumbai, India July 2021 - June 2023

PROJECTS AND PUBLICATION

eBay Product Search Website and Android App Angular, Node.js, Typescript, HTML5, CSS3, Android, Java, Python, JSON - Designed a responsive web application using Angular and Node.js to fetch and display eBay product listings via a REST API - Implemented a MongoDB database to store user wish lists and deployed the application on Google Cloud Platform (GCP) - Created a companion Android app in Android Studio (Java), integrating backend services with Node.js to enable eBay product searches, wish list management, and seamless item sharing on Facebook	
Drug Information Project – Web-Based Drug Lookup Tool React, Python, Flask, AWS EC2, Nginx, Unicorn, Elastic IP - Developed and deployed a full-stack drug search platform handling 10,000+ real-time queries via OpenFDA API, with a React frontend and Flask backend hosted on AWS EC2 using Nginx and Unicorn - Built a responsive frontend with advanced search by name and alphabet, improving lookup speed and user efficiency by 40% - Integrated a field-based query chatbot and detailed drug info pages, increasing user engagement and average session time by 30%	
Grow Slide (Unity 2D Platformer Game) Unity, C#, WebGL - Designed and architected a 2D platformer game with innovative gravity mechanics, enabling players to strategically shrink and expand a controllable ball to solve movement puzzles. - Integrated dynamic gameplay elements, such as collecting keys to unlock levels, improving user engagement and experience. - Published game using WebGL, ensuring cross-platform accessibility and high performance	
Fine Dine with Augmented Reality (AR) – Mobile App Unity, Vuforia, Blender - Developed an AR-based restaurant app, boosting customer satisfaction by 20%, allowing users to explore 3D visuals of dishes and ingredients through digital or physical menu scans, complete with interactive feedback mechanisms Publication: Gandhi, M., et al. “Augmented Reality Based Interactive Mobile Application for Restaurants.” ACE 2021	
Predicting Customer Churn in Bank using ANN Python, NumPy, Keras, TensorFlow, Scikit-learn, Pandas Created a predictive model using Artificial Neural Networks (ANN), classifying customer attrition rates in a bank with an accuracy of 86.31% and visualizing Neural Networks for clear interpretation and insights	

TECHNICAL SKILLS

- Programming Languages:** Java, Python, Go, JavaScript, TypeScript, SQL
- Backend Technologies:** Spring Boot, Microservices, Node.js, Flask, Next.js, Kafka
- Frontend Technologies:** React, Angular, HTML5, CSS3, Bootstrap
- Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, Jenkins, CI/CD, Terraform
- Databases:** MongoDB, MySQL, PostgreSQL, Oracle, NoSQL, SQLite, Firebase
- Version Control & IDE:** Git, Bitbucket, GitHub, VS Code, IntelliJ, Eclipse
- Operating Systems:** Windows, MacOS, Linux, Unix

CERTIFICATION

- **AWS Certified Cloud Practitioner**, Amazon Web Services (AWS), March 2023
